

JUSTIN MORGAN

CAREER OBJECTIVE

Efficient Computer Engineering major (3.7 GPA) currently attending the University of Central Arkansas, with 1+ years of computer science and engineering. I am aiming to leverage a proven knowledge of databases, software development, programming language, and procedure standardization skills to be a successful team member within a growing organization.

PROJECTS

REAL-TIME WEATHER FORECASTING APP

Using Java-script, HTML, CSS, and Weather API

- Used HTML and CSS to format and display a weather forecasting application with a different background depending on the weather
- Incorporated Java-script to route a real-time weather API to the application to show current weather reports depending on the city entered by user.

EXPERIENCE

Database Engineer Intern | January 2023 - Current

Axiom LLC – Conway, AR.

- Supported team members by researching best practices, providing insights, and assisting in the implementation of modern database technologies.
- Observed the migration of the company's legacy database infrastructure to a modern, scalable cloud-based solution.
- Instrumental in optimizing SQL queries and views resulting in enhanced database performance and efficiency.

EXPERTISE

- **C++**
 - Highly skilled and knowledgeable in C++, possessing an in-depth understanding of the language's intricacies, enabling me to craft efficient, robust, and maintainable software.
- **SQL**
 - Possess a profound grasp of relational database theory and SQL programming principles, exemplified by a successful history of collaboration with interdisciplinary teams and a track record of delivering exceptional data-driven solutions.
