JUSTIN MORGAN

CAREER OBJECTIVE

An efficient Computer Engineering major (with a 3.7 GPA) currently attending the University of Central Arkansas, I have over 1 year of experience in computer science and engineering. I am determined to utilize my proven knowledge of database, software development, and programming languages to contribute as a successful team member within a growing organization.

PROJECTS

ALGEBRA CALCULATOR
Using C++

- *C++ program designed to solve linear equations. It utilizes a binary tree structure and token system to parse and evaluate algebraic expressions inputted by the user*

REAL-TIME WEATHER FORECASTING APP
Using Java-script, HTML, CSS, and Weather API

- Incorporated Java-script to route a real-time weather API to the application to show current weather reports depending on the city entered by user.

EXPERIENCE

Database Engineer Intern| January 2023 - Current
Acxiom LLC – Conway, AR.

- Supported team members by researching best practices, providing insights, and assisting in the implementation of modern database technologies.
- Instrumental in optimizing SQL queries and views resulting in enhanced database performance and efficiency.

EXPERTISE

- **C++**
  - Highly skilled and knowledgeable in C++, possessing an in-depth understanding of the language's intricacies, enabling me to craft efficient, robust, and maintainable software.
- **SQL**
  - Possess a profound grasp of relational database theory and SQL programming principles, exemplified by a successful history of collaboration with interdisciplinary teams and a track record of delivering exceptional data-driven solutions.
